

ASPLUND CARPET GUIDE

HOW TO CALCULATE SIZE

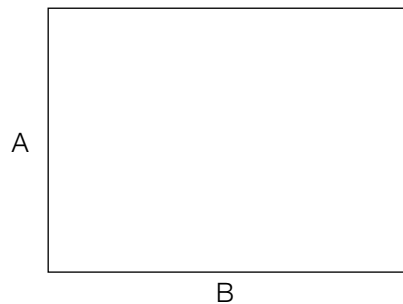

Round Carpets

$$R \times R \times 3.14(\pi) = m^2$$

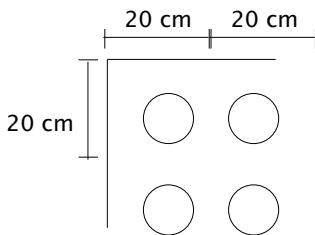

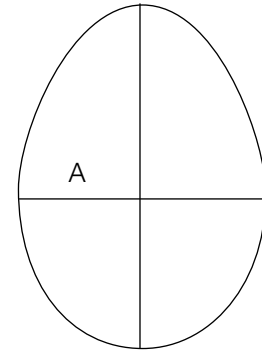

Rectangular or Square Carpets

$$A \times B = m^2$$

Odd Shapes

$$A \times B = m^2$$

Do not forget to take into consideration pattern repeat. Please note that there are different repeat measurements for different patterns.

% = The carpet has to be proportionally enlarged/diminished.
To enlarge calculate like this: Requested width (A) \times 1,5 = length (B).
To diminish calculate like this: Requested length (B) \div 1,5 = width (A).
In square shaped carpets, A and B have the same length.

CARPET QUALITIES AND MAINTENANCE

High quality New Zealand wool is rich in natural fats and will provide good protection against stains. The best way to keep all carpets fresh is to vacuum often with the brush out. That will take away most soil and wool residue and the carpet will keep its shiny lustre.

RUGS

Hand tufted in 100% wool.
Weight 3,5-4 kg per m². Pile: approx. 20 mm.
Available in all 54 colours.
Water wash, mild detergent, no chemicals.
